Instrum. De podologia

Fundada em 1976, a Metalúrgica Fava tem atuação destacada nos setores hospitalar e odontológico, resultado de muita dedicação aliada a competência e cuidado em cada etapa do processo produtivo.

Iniciando com a fabricação de estojos, logo expandiu sua linha para bandejas, cubas e tambores, motivada pela necessidade de oferecer produtos de alta qualidade aos profissionais da área, isso fez com que a Metalúrgica Fava alcançasse uma posição de destaque e reconhecimento tanto no mercado nacional quanto internacional.

Apoiada em sua experiência e baseada nessa necessidade de estar qualificando o mercado com produtos compatíveis com a evolução do conhecimento adquirido por seus profissionais, em 1989 passamos a fabricar Pontas Diamantadas, com exclusivo processo de incorporação do diamante, conferindo maior durabilidade e resistência.

Em 2002, iniciamos a produção de máscaras e toucas descartáveis em polipropileno – no woven – resultado de investimentos realizados, com recursos próprios, na aquisição de máquinas de última geração, e qualificação de pessoal.
